The Essentials of Contracting & Contract Negotiation

Course Overview:

Public works and operations Contracts are a lifeline for any Organisation. Through such contracts, the money will flow in and out for the public interest based on the particular contract terms. If the contract is not carefully negotiated, prepared and managed, the Government can be exposed to risks with costly contractual disputes and financial losses aligned with misuse of public resources. It is therefore important during contracting and contract negotiations to understand and know what and how to use your contract to suit particular circumstances.

This course will equip participants with effective solid drafting skills and an appreciation of the principles of contractual interpretation. This course will also explain the main critical terms and clauses to negotiate when reaching an agreement.

Every day significant monies are made and lost by organizations as a result of the contractual terms and conditions governing contracts for the purchase of goods, equipment, and services. Since all business activities are governed by contractual relationships, it is increasingly important for all those dealing with outside organizations to have an understanding of how to obtain the best possible agreement for their organization.

The course will look at how contracts are created, and some of the main clauses that appear in contracts, together with many alternative contracting strategies and structures. The course will then consider methods to use in negotiating contracts, including techniques relating to negotiating variations and claims

Course Objectives:

At the end of this course, the participants will be able to:

- Provide an understanding of how contracts are formed
- Give an in-depth analysis of issues behind major contract clauses
- Improve appreciation of legal issues in contracts
