Understanding the Practice of Contract Drafting and Negotiation in the Public Sector

Course Overview:

Contracts are the basic structure of all occupational relationships in public projects, whether they be for the construction of a major new facility, or the supply of goods, the terms and the management of the contract itself are critical to the success of the projects concerned. As such, contracts touch every aspect of the industry, and all staff (whether directly involved in contract management or not) must understand how they operate, particularly in an international context.

The training covers the three stages of contracting; negotiating the “deal”; documenting that deal in a robust, but practical way; and managing the performance of the contract itself. The intention is to develop general skills with application to a wide range of contracts and to allow participants to have an awareness of practices in other areas and other industries, which may add value to their situations. This training will also allow considering matters from the perspective of the other party to a contract.

Course Objectives:

At the end of this course, the participants will be able to:

- Emphasize the need to negotiate the “deal” before structuring the contract documentation
- Provide tools and techniques to assist in such negotiations
- Examine the drafting and modification of specific contract clauses, using real examples
- Look at some of the differences in approach in different jurisdictions (and the common themes that run through contracting)
- Review some of the skills that will enhance the efficient management of contract
- Examine ways to avoid disputes, or manage them successfully
