Financial Management for Projects & Contracts in the Public Sector

Course Overview

With increasing competition and focus on corporate earnings, project and contract managers are held accountable, not just for achieving technical and scheduling goals, but also for meeting profitability targets and other cost-related measures.

This training course explores the financial metrics that are commonly used and also examines the less frequently thought of the financial impact of typical operating decisions and actions. Building on your competencies, you will examine the inner mechanics of how finance and accounting can impact your project.

Course Objectives:

At the end of this course, the participants will be able to:

- Communicate more effectively with accounting and financial personnel
- Read, understand, and analyze accounting and financial data
- Expand your work in project scheduling and cost control to encompass additional financial metrics and tools
- Minimize project financial risk
- Develop and apply tools for comparing project financial returns
- Understand how finance often drives organizational decisions and evaluations of project performance.
