Operational Risk Management & Mitigation in the Public Sector

Course Overview:

This Operational Risk Management and Mitigation course develops the understanding, skills, methods and behaviors required to proactively manage risk across your operations – helping ensure day-to-day operational continuity, as well as the long-term sustainability of your organization. Based on a proven framework and introducing best practice techniques. This course provides a deep understanding of the human, process, systems, and organizational causes of risk and how to minimize them, including insight into the psychology of risk prevention and the need to combat external threats. It will enable the delegates to examine their operations and take steps to plan and manage risk within their workplace

Course Objectives:

At the end of this course, the participants will be able to:

- Appreciate the benefits of proactive Operational Risk Management
- Construct an effective Risk Management Plan
- Conduct Risk Identification and Risk Analysis
- Plan a response to risk and take action to mitigate it
- Implement an Operational Risk Management Framework within their organization
- The document, report and manage Operational Risk
