## The Journey to build a Customer Centric Organization in the Public Sector

#### **Course Overview:**

Becoming customer-centric is one of the most important aims of any organization. Customer centricity refers to the orientation of a company to the needs and behaviors of its customers, rather than internal drivers such as the quest for short-term profit. Customers have high expectations and demand quality customer service from companies they choose to do business with. Providing customer service excellence gives an organization a competitive advantage in the marketplace and is the key factor that keeps customers coming back. Successful organizations understand the importance of developing a customer-centric mindset and deliberately restructure their customer service model to increase customer satisfaction and brand loyalty.

Today, customers have an increasing range of choice: choice of supplier, choice of channel, choice of products and services. Their loyalty is determined by the quality of the experience they receive. Delegates will learn effective customer-centric strategies and best practices to provide world-class customer service excellence.

### **Course Objectives:**

At the end of this course the participants will be able to:

- Establish the importance of setting and reviewing customer service standards
- Develop an understanding of internal and external customer expectations
- Communicate more effectively by utilizing active listening and questioning skills
- Demonstrate how to deal with difficult or demanding customers in a professional manner
- Set SMART objectives and goals to become more productive
- Utilize stress management techniques to increase job satisfaction
- Develop a strategy to build a more proactive, customer-centric organization
- Analyze and implement the 'best practices' of world-class customer-centric organizations
